## TOOK BIG DOSE OF MORPHINE

Nebraska Man Swallowed 60 Grains of Drug.

EVIDENTLY WANTED TO DIE

Motive Said to be Fear of Injury by Enemy.

Beatrice, Neb., Jan. 8.—Charles H. McDaniels, employed at Swift & Co.'s local house, committed suicide last night by taking sixty grains of morphine. Two physicians were summoned but no relief could be given. McDaniels was rooming at S. Atherton's on South Sixth street with a man named Moss. He was a married man, but was not living with his wife, the two having separated. It is said, a short time ago. Mrs. McDaniels taking rooms in the Green block. The only motive ascribed for the man's self-murder is said to be a fear that another man residing here would do him bodily injury, the story being current that the husband of a former friend of the family had threatened him. It is also said that this was the cause of the couple separating. Mrs. McDaniels, early in the evening, told Moss, his room mate, that he was going to kill himself, and after he had drunk the poison told Moss of what he had done. Mrs. McDaniels, when told of the suicide this morning, at once went to see her former husband's remains and exhibited signs of great grief. The deceased was 36 years old and once lived at Superior. He was a member of the Knights and Ladies Security, in which order he was insured for \$200. His membership was in the Superior lodge. Cook & Scott have charge of the remains. The funeral will be held tomorrow at 2 o'clock.

HAS BEEN PROSPEROUS YEAR.

Local Y. M. C. A. Did Much Work in 1902.

The annual report of the secretary of the Wichita Y. M. C. A. was made public yesterday. It shows the association to be in a flourishing condition. Every branch has been paid and there is a small sum left in the bank. The meetings have been very well attended and much good has been accomplished. The gymnasium was started something over a year ago, and the report shows that it had been greatly appreciated by the young men of the city.

The report in full is as follows:

Annual Report of the Young Men's Christian Association of Wichita, Kansas, for the year January 1, 1902, to December 31, 1902.

Another year has passed and the year 1902 takes its part in the history of the Young Men's Christian association of Wichita. While the work of the year has not been all that it might have been, some gains over last year have been noticed. The following is a synopsis of our work in departments:

Our religious work—Number of gospel meetings for men, 42; total attendance, 1,574; average attendance, 42; smallest attendance, August 24, 11; largest attendance, 1,574; personally delivered, 1,574; rose for prayer, 12; conversions, 2; number of Bible classes, 20; attendance, 301.

Greater effort should be put forth on the part of those risen in Christ that they might go forth and compel others to come in and partake of the gospel feast.

Membership—We are constantly adding new members to our list. As some drop out, others fill their places, so we have many opportunities of speaking a cheering word and encouraging the young men on their life's journey. The present enrollment is: Sustaining, 96; active members, 115; associates, 184; junior, 35; total, 430.

Seventeen visits to the sick have been made and 18,069 invitations distributed upon the streets.

Sometimes it seems as though our invitations were thrown to the wind, but now and then a man is led to a higher spiritual life, and we feel repaid for our efforts put forth.

Employment and Boarding House—Situations filled, 10; directed to boarding houses, 23; letters of introduction, 7; otherwise assisted, 20; visits to the sick, 17; letters written by young men, 10; gymnasium and bath room—This department has steadily grown. Men are seeing the results of systematic bodily exercise. It enables men who pursue sedentary habits to do better and more efficient work.

Number of senior classes, 4; total attendance, 1,290; number of junior classes, 20; total attendance, 1,491; business men's class, 17; attendance, 121; men using gymnasium, 299; examinations, 51.

FED THE PROFESSOR.

This One Had "Dreams More Terrible Than Visions of the Comet."

You must feed the professors and teachers right or they can't do justice to pupils. They should of all people possess a healthy nervous and mental organization. The teacher with weak nerves can't obtain as good results as the one who has a perfect mental poise.

"It had been for me a most difficult problem," said a professor connected with a prominent college of the south, "how to keep the nerves in proper condition and the brain in good working order. Lack of proper opportunity to take exercise, an irregular diet and improper food brought on a general break-down in health. I became irritable and restless and at night would dream of more terrible things than that of Dr. Holmes' visions of 'The Comet'."

"Upon the suggestion of a friend, who is a busy business man, I commenced to eat Grape-Nuts every day, and found in a short time a great improvement in my health; the food contained just the right kind of nourishment for my body and brain that was lacking. The restlessness disappeared, my stomach ceased to trouble me, mental vigor returned and I am now able to do more and better work than ever before."

"When friends express surprise to find me so well, it is necessary only to mention the merits of Grape-Nuts." Name given by Postum Co., Battle Creek, Mich.

## BABY'S FUTURE

Something for Mothers to Think About.

Lives of Suffering and Sorrow Averted

And Happiness and Prosperity Assured by

Cuticura Soap, Ointment and Pills

When All Else Fails.

Every child born into the world with an inherited or early developed tendency to distressing, disfiguring humors of the skin, scalp and blood, becomes an object of the most tender solicitude, not only because of its suffering, but because of the dreadful fear that the disfigurement is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest and most effective treatment available, viz., The Cuticura Treatment.

Warm baths with Cuticura Soap to cleanse the skin and scalp of crusts and scales, gentle applications of Cuticura Ointment, to allay itching, irritation and inflammation, and soothe and heal, and mild doses of Cuticura Resolvent Pills, to cool the blood in the severest cases, are all that can be desired for the alleviation of the suffering of skin tormented infants and children, and the comfort of worn-out parents.

Millions of women use Cuticura Soap, assisted by Cuticura Ointment, for preserving, purifying and beautifying the skin, for clearing the scalp of crusts and scales and dandruff, and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, for baby rashes, itches and chaffs, in the form of washes for annoying irritations and inflammations, and for many sanative, antiseptic purposes which readily suggest themselves.

Printing, \$38.00.

Borrowed money, \$28.15.

Lights and fuel, \$25.25.

Furniture and repairs, \$154.11.

Incidentals, \$165.89.

Total, \$444.35.

Balance on hand January 1, 1903, \$5.50.

Total \$449.85.

Three free will offerings were taken on

October Sabbath and the amounts were

apportioned as follows: \$4.00 work in

Philippines, \$2.50 to temperance work in

the state, \$2.50 to our own local work.

## CORRUPTION IN MOROCCO

Is Worst Governed Land in All the World.

IS ABSOLUTE DESPOTISM

Country Is in Darkness and Will be Kept So.

In Morocco, writes A. J. Dawson, all official positions of every sort and rank are obtained quite openly by purchase. To purchase the governorship of a given province means to acquire the right of extorting from the people of that province every farthing that can be ground out of them, by fair means, by force, or by such foul methods as torture and starvation. Out of this a certain annual tribute must be sent to his Shareefan majesty, lord of all the faithful, maker and breaker of all officials. In the same way to be a guard or policeman (the word in use is assassen, from which we naturally derive our assassin) implies not the holding of a post bringing in a salary of so much a month, but merely that one is a licensed extortioner and rogue with in the limits of petty larceny. As, for example, the pusha of a town sends two of his assassen to arrest a certain citizen who is suspected of the crime of possessing secreted savings. Those assassen may not attempt to force his treasure from the citizen for themselves. That is meat for their master. But usage says they may and will extort what they can from the man—a handful of silver, say—with threats of rough treatment or promises of favor. That is their business and its rewards are understood to be their sole source of income.

Habes corpus is, of course, totally unknown in Al Moghreb. A judge's dictum usually runs in this wise: "Take him to the prison," or "Let him be beaten." In two latter cases the matter is put in hand forthwith, while the judge takes snuff and turns upon his cushions, a slightly bored spectator, his nod sufficient to decide whether the culprit should be merely bruised, maimed, half killed or actually done to death. A deliberate sentence, in which a period of months or years of imprisonment is named, is never pronounced. Such a method would never answer, for the duration of any prisoner's confinement depends entirely upon the length of time taken by his friends in scraping together a bribe which shall satisfy the responsible official. And this, whether the crime be the most dastardly kind of murder or the merest bagatelle, or nothing at all beyond the misfortune of being judged a prosperous man with a few eggs worth plundering.

While in prison—and you will bear in mind that the best and the worst of men are equally unable to avoid the risk of imprisonment at any time—a man is given nothing whatever by the authorities if there is a friend within reach who can be induced to supply as much as a piece of bread per day. If, on the other hand, a prisoner should prove absolutely friendless, less a state of things fortunately rare among all primitive people) the authorities allow him one bran loaf, the shape and size of an English bath bun, each day. And that is all. For water, Moorish prisoners depend upon the keeper of their prison, who usually supplies two kishna per day paid out of penance taken from incoming and outgoing prisoners. The doorkeeper, being an official, is unpaid, and pays, in presents to the official next in rank above him, for the privilege of making just such as he is able by extortion. He appoints one prisoner as head or captain of the whole number confined. This again is a license to rob and oppress. In return for which the prisoner paid daily tribute to the doorkeeper. He keeps order among his fellows, distributes water, metes out corporal punishment, and extorts tribute in money, food, tobacco and the like.

SENATOR McCORMACK MADE REPORT FOR SUBSTITUTE BILL.

Washington, Jan. 8.—Senator McCormack, chairman of the senate committee on manufactures, today reported from that committee a substitute for the pure food bill which recently passed the house.

The substitute strikes out the provision of the bill requiring the agricultural demand to fix a standard of purity for foods and drugs and confines itself largely to prohibiting interstate commerce in adulterated or misbranded articles.

Benjamin Zook, Fort Wayne, Ind.

E. J. Burdette, Dayton, Ohio.

Train No. 35, westbound for Fort Wayne, started out of the station, but at the main street crossing was compelled to stop on account of some accident to the air brake. A fireman was sent back to notify No. 19, a fast train, going in the same direction, which was several minutes late. On account of a driving snowstorm, the engineer of No. 19 was unable to see the signal in time to slacken his speed and his engine crashed into the rear coach of No. 35, running at the rate of forty miles an hour. No. 35 consisted of two coaches, the rear one being a combination baggage and passenger car, with another passenger car in front. Both were telescoped and scarcely a passenger escaped injury of some sort. The engineer and fireman of No. 19 were also slightly hurt, but not enough to prevent them from rendering immediate assistance to those who were in greater distress.

The engine of No. 19 was almost demolished, but the cars behind it were not damaged in the least and none of the passengers were injured.
